III. Discussion and analysis of the operation

1. Brief of the operation in Period

Dose the Company need to comply with disclosure requirements of the special industry

No

During the reporting period, according to the annual key work and strategic planning objectives, the company focused on the post-restructuring integration development and corporate strategy reshaping, and effectively exerted the leading role of party building, and implemented the reform requirements of “Double Hundred Actions” throughout the various key work. The main economic indicators in the first half of the year have been completed well, the quality of main business development has been improved, the construction of strategic projects has been steadily advanced, and the internal management and control level has been further improved.

1. Main business development

During the reporting period, the company

based on its own advantages and industrial development, used information technology, innovated and opened up the grain and oil products supply channels and trading methods, created a new pattern for tea and food business industry, built a multi-group and multi-channel food supply chain and service network, expanded the effective supply of medium- and high-end grain, oil, and food, and strived to meet people's needs of "quality, diversity, nutrition, health, green, and convenience", and promoted the transformation of grain and oil products from "eat full" to "eat well".

As the “grain security” project and “rice bag” in Shenzhen, the company completed the government grain and oil reserve service with quality and quantity guaranteed during the reporting period, the monthly average grain reserve was 1.065 million tons, and the monthly average oil reserve was 12,100 tons, which guaranteed the sufficient grain and oil supply and stable price in Shenzhen through the balanced rotation of grain and oil.

During the reporting period, the company integrated and reconstructed the deep processing of tea and natural plants, and allocated the staff. Through integration, some businesses initially achieved stop loss or turnaround goals.

2. Key projects

During the reporting period, the construction and operation of the company's Dongguan grain logistics node progressed smoothly. The construction of grain logistics and terminal supporting projects, CDE warehouse project, food deep processing projects and the first phase of the wharf have been steadily advanced according to the plan and progress. The international foods wharf loaded and unloaded 128 vessels with a turnover of 180,000 tons. The subordinate Dongguan logistics company promoted the establishment of safety production standardization and achieved results, and was awarded the second-level enterprise of safety production standardization.

During the reporting period, the company's northeast grain source base project achieved “breaking ice”. In order to speed up the implementation of the “North Grain to the South, South Grain for Storage in North” strategy, the company set up the infrastructure office of the Northeast Grain Source Project to accelerate the construction of the grain source base project. In June, the main project of the first phase of the Northeast Grain Source Base Project of 150,000 tons has been started.

During the reporting period, the company focused on promoting grain and oil platform transactions. At the 2nd China Grain Trade Conference, “www.zglsjy.com.cn” further expanded the market influence and expanded new customers to bid and list trading on the basis of serving internal customers. As of June, the “www.zglsjy.com.cn” had a trading volume of 2.2 million tons.

3. Continuous innovation and development

During the reporting period, the company improved the efficiency of its operational management by increasing the application of informatization innovation results to ensure the sustainable and healthy development of enterprise. At present, the innovative R&D system with Shenliang research institute as the core and with the far-reaching data, the product research and development center of flour company, the duoximi quality inspection R&D department, the technology center of reserve branch, the tea product and technology research and development center as the key supports has been focusing on the innovation and research and development of informatization projects, guided by the operational management needs and the development of the industry's most cutting-edge technology, planned and completed 14 informatization projects such as company management and control and innovation management platform. Up to now, the company has 69 patents and 23 software copyrights.

4. Other key tasks

(1) During the reporting period, the company completed the organizational restructuring, completed the changes of company name, business scope, registered capital and securities short name, and completed the reelection of the board of directors, the board of supervisors and senior management personnel. In accordance with the new regulatory requirements and relevant regulations and procedures, the company completed the combination and revision of the internal systems to promote the improvement of corporate governance, and further enhanced the management effectiveness of the company through various effective measures.

(2) During the reporting period, the company implemented the relevant requirements of the “Double Hundred Actions” state-owned enterprise reform, further expanded the compensation system and incentive and restraint mechanism, and completed the overall market-based selection and employment of the management teams of some subordinate units, and promoted the rotation exchange of key position talents, and further optimized the company's talent echelon construction.

(3) During the reporting period, the company further strengthened fund management and control, and in accordance with the centralized management mode of “internal bank” funds, promoted the online reporting platform, and effectively supervised the expense reimbursement, capital expenditure and operating expenses of the company headquarters and subordinate units. At the same time, the company further improved the CBS fund management information system function, and fully opened the bank-corporate direct linkage of 9 banks to realize the system supervision of banks and accounts. During the reporting period, the company promoted the subordinate units to optimize the structure of the debts and achieved remarkable results.

(4) During the reporting period, the company built a new pattern of safe production, further strengthened the concept of safe development, strictly implemented the responsibility system for production safety, consolidated the foundation of safety management, investigated hidden dangers and immediately rectified them, and became the first enterprise in the municipal state-owned assets system to complete the “double” prevention mechanisms and safety standardization construction. The company closely followed the theme of “preventing risks, eliminating hidden dangers, and restraining accidents”, and has comprehensively launched the “Safe Production Month” activities.

In the first half of 2019, the company achieved a total operating income of RMB 4,782,167,700, an increase of 7.84% over the same period of the previous year (after restructuring); operating profit of RMB 235,345,700, an increase of 7.38% over the same period of the previous year (after restructuring); net profit attributable to shareholders of listed companies was RMB 203,168,900, an increase of 0.19% over the same period of the previous year (after restructuring).

2. Relevant items involving financial report

(1) Particulars about the changes in aspect of accounting policy, estimates and calculation method compared with the financial report of last fiscal period
